FULL FUNCTIONAL PROJECTS

AnonAddy App [Listed on Google Play Store]

AnonAddy is an anonymous email forwarding service. App integrates AnonAddy's public API.

It interacts with 18 different API endpoints to:

- Fetch all account and alias data.
- Easily create, edit, and update aliases.
- Activate, deactivate, delete, and restore aliases and recipients on the fly.
- Search aliases by email address, alias, or description.
- ... and many more.

Technical:

- Utilizes Riverpod (provider 2.0) as state management.
- Decoupled UI from business logic.
- Advanced error handling.
- Advanced search and filtering functionality.
- Simple and intuitive UI for better UX.
- Encrypted secure storage for access token.

- Flutter Mobile App Development
- Mobile App UI and UX Design
- Firebase SDK
- Cloud Firestore Database
- API Integration
- Version Control (Git)
- Dart language
- Play Store Listing

SOFT SKILLS

- Critical thinker
- Problem Solver
- Detail oriented
- Open minded
- Always learning and improving

EDUCATION

No Degree, Information Technology

South Central College - Mankato, MN
2012 - 2014

SPOKEN LANGUAGES

- Somali
- Arabic
- English

Yaanyo App

Yaanyo is a real time chat and shopping checklist app. It can be used as a regular chat app, to-do app, or even a daily tasks manager/organizer.

It's built with flutter, authenticates with Firebase, and utilizes Firestore database as cloud data storage:

- Real time chat with family, friends, or anyone. Simply add them by email.
- Add to-do tasks on the fly categorized by store names in grids and colors.
- Chats and to-do tasks sync across devices in real time.
- Simple and intuitive UI for better UX.
- Project is under development. App is consistently improving.

DEMO PROJECTS

Banking App

Modern banking app with beautiful UI and intuitive UX.

App comes with 5 screens:

- Login screen, clean and simple two tone screen.
- Personalized home screen with user's name and avatar along with all accounts and their balances.
- Pay on the go with contact-less payment, quickly access debit/credit cards. Protected with biometric security.
- Account screen contains account balance, pending and posted transactions, along with a custom offer for each user.
- Simplified settings/profile screen where user can do it all, from changing password to contacting support.

Speedtest

Simple Internet speed testing app. Built with simplicity in mind.

- Home screen with bottom navigation bar, an app bar, and 3 tabs. That's it.
- History of previous speed tests with all necessary details (IP, time, location, device) and beautifully animated gauge.
- Persistent Light and dark themes using Provider and SharedPreferences packages.

KDE Connect

A redesign of KDE's Connect App with modern UI/UX and simplified settings.

- Design follows one simple principle: one screen shows it all. No digging around. No complex navigation.
- Combined all settings in one screen under for easier and friendlier navigation.
- Persistent Light and dark themes using Provider and SharedPreferences packages.
